Portfolio: <https://chinfrommy.github.io/Personal-Portfolio/>

SUMMARY

Third-Year Computational Science student with experience in Python, SQL, R, JavaScript, Java and C++ through coursework and personal projects. Interested in frontend and backend development, machine learning and software testing. Eager to gain hands-on industry experience while contributing reliable and meaningful software solutions. Available for a 6-month internship from March to August 2026 and open to relocation.

EDUCATION

Bachelor of Computer Science (Computational Science) with Honours

University Malaysia Sarawak (UNIMAS)

CGPA: 3.80

Kota Samarahan, Sarawak

Oct 2023 – Aug 2027 (Expected)

Sijil Tinggi Persekolahan Malaysia (STPM)

SMJK San Min

CGPA: 3.09

MUET band: 4.5

Teluk Intan, Perak

July 2021 – April 2023

PROJECTS

Flood Prediction Machine Learning System

Python, FastAPI, Streamlit, PyTest, GitHub Actions

- Built an end-to-end ML prediction system with RESTful APIs (FastAPI) and a Streamlit dashboard.
- Developed automated API tests using PyTest and Requests and integrated CI testing with GitHub Actions.
- Applied cross-validation and hyperparameter tuning (Grid Search) across Random Forest, Logistic Regression, SVM, KNN and Decision Tree models.
- Conducted failure analysis and performance benchmarking to select the optimal production model (Random Forest), improving accuracy by ~10%.
- Deployed backend and frontend services on Render.
- GitHub link: <https://github.com/ChinFromMY/flood-prediction-ml-system.git>

AI Chatbot System

React, REST API, LLM Integration

- Developed a frontend web application using React integrated with Hugging Face LLM inference APIs.
- Designed reliable API interaction handling, including response validation and basic error recovery logic.
- Implemented basic API reliability testing to ensure stable chatbot behavior under edge cases.
- Gained hands-on experience with client-server architecture and real-world AI system integration.
- GitHub link: <https://github.com/ChinFromMY/React-AI-Chatbot.git>

Interactive Learning Quiz Application

Java, Object-Oriented Programming

- Developed a modular Java-based quiz application with interactive UI.
- Implemented application logic and verified functionality through testing and debugging.
- Collaborated with team members to deliver project requirements on time.
- GitHub link: <https://github.com/ChinFromMY/Interactive-Learning-Quiz-Application.git>

SKILLS & LANGUAGES

Programming Languages: Python, JavaScript, Java, R, C++

Backend: FastAPI (REST API development), Pydantic (basic), Node.js (basic)

Frontend: HTML5, CSS, React, Streamlit

Testing & CI/CD: PyTest (basic), API testing (basic), GitHub Actions (basic)

Databases: MySQL, Supabase (basic)

Version Control: Git, GitHub

Languages: English, Malay, Mandarin

CERTIFICATIONS & ACHIEVEMENTS

Introduction to Cybersecurity | Cisco Networking Academy

- Completed training in foundational cybersecurity concepts and best practices.

Gemini Certified University Student | Google for Education

- Certified in responsible and ethical use of generative AI.

Dean's List Award (UNIMAS)

- Achieved Dean's List for three consecutive semesters with GPA above 3.50.
